PROFESSIONAL SUMMARY

Computer Science Engineering graduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience in Python programming, SQL, application development, and machine learning projects. Familiar with object-oriented programming, data structures, debugging, Git version control, and software development fundamentals. Experienced in developing responsive web interfaces, building data processing workflows, and implementing deep learning models using PyTorch. Seeking an entry-level Software Developer or Associate Software Engineer role to apply programming, analytical, and problem-solving skills to software development.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript
Computer Science Fundamentals: Object-Oriented Programming (OOP), Data Structures, Software Development Life Cycle (SDLC), Problem-Solving
Software Development: Application Development, Debugging, Code Refactoring, Responsive Web Development
Version Control: Git, GitHub, Commit, Push, Basic Branching
Databases: MySQL, Microsoft SQL Server, SQL Queries, JOINs, Aggregate Functions
Web Technologies: HTML, CSS, JavaScript
Machine Learning and AI: PyTorch, Torchvision, Scikit-learn, NumPy, Matplotlib, Deep Learning, Transfer Learning
Data Tools: Power BI, Power Query, DAX, Advanced Excel

INTERNSHIP EXPERIENCE

Front-End Development and UI/UX Intern

Knackbay Web Technologies | Katpadi, India
September 2023 – December 2023

- Developed responsive and interactive web application interfaces using HTML, CSS, and JavaScript.
- Refactored existing front-end code to improve code organization and maintainability.
- Debugged interface issues and worked on translating UI/UX designs into functional web pages.
- Collaborated with designers and developers to implement interface requirements and support application development.

- Gained practical experience in coding practices, software development workflows, and team collaboration.

Intern Data Analyst

Jeanuvs Private Limited | Chennai, India
July 2025 – September 2025

- Used Python and SQL-based workflows to collect, clean, transform, and analyze business datasets.
- Developed 3 interactive Power BI dashboards covering revenue, sales, and purchase performance.
- Applied data transformation and modeling techniques using Power Query and DAX to support reporting workflows.
- Worked with cross-functional teams to understand requirements, process data, and communicate technical findings.
- Strengthened practical skills in data handling, analytical problem-solving, and working with business datasets.

PROJECTS

Skin Disease Classification Using Deep Learning

Technologies: Python, PyTorch, Torchvision, EfficientNet-B0, Scikit-learn, NumPy, Git

- **Developed a Python-based deep learning application to classify skin diseases into 9 categories using the ISIC dataset.**
- Implemented transfer learning using the EfficientNet-B0 architecture for image classification.
- Built data preprocessing and augmentation workflows to prepare image datasets for model training.
- Evaluated model performance using accuracy, precision, recall, and a confusion matrix.
- Used Git to track code changes and manage incremental development.

Walmart Sales Analysis Using SQL

Technologies: MySQL, SQL

- Analyzed sales data from 45 Walmart stores using SQL queries to identify business and product performance trends.

- Wrote queries using JOINs, GROUP BY, and aggregate functions to retrieve and process data.
- Analyzed sales by branch, city, customer type, and date to derive insights from structured datasets.

Zomato Restaurant Analysis

Technologies: Power BI, Power Query, DAX

- Analyzed a dataset of 9,551 restaurants across more than 15 countries.
- Performed data cleaning and transformation using Power Query.
- Created DAX calculations and visualizations to examine restaurant ratings, pricing, and trends.

Sales Analysis with Budget Management

Technologies: Power BI, Power Query, DAX

- Developed an end-to-end reporting solution to analyze sales, profit, and budget-related performance.
- Applied data transformation and analytical calculations using Power Query and DAX.
- Identified the top 5 selling and most profitable subcategories through data analysis.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering

Specialization: Artificial Intelligence and Machine Learning
Sathyabama Institute of Science and Technology
August 2021 – April 2025

Higher Secondary Education (Class XII)

Velammal Matriculation Higher Secondary School, Chennai
June 2020 – March 2021

CERTIFICATIONS

- Introduction to Data Analytics Course – Simplilearn | June 2025
- Skill Certification Test in Data Analyst – oneroadmap | June 2025
